FASTWALL
Relocatable Partitioning and Storgewall

MULTI-FACETED MINIMA

With its mullion-free glazing system, MINIMA offers a wide range of **effective** solutions to partitioning needs.

ALL WOOD MINIMA

Truly bespoke – bring us your ideas and we will develop them with you into the type of quality projects seen here.

Glass doors can be framed, frameless or sliding. Timber doors may also be used.

MINIMA can be single or double glazed

Manifestation can provide dramatic impact

Glass joints can be silicone, but we recommend our clear dryjoint system. It is better aesthetically, facilitates relocatability and laboratory tests to BS 5234 confirm that MINIMA can use 10mm glass where other systems may need 12mm or even 15mm glass to comply with the Standard.

Phone, email or visit our website for further literature on the Fastwall relocatable partitioning system, Fastwall MAXIMA Storage wall, the Fastwall Guide to Interior Building Acoustics or the Fastwall CD.
